THE TIMKEN COMPANY

Timken Lubrication

Timken application- and environment-specific lubricants have been developed by leveraging our knowledge of tribology and anti-friction bearings and how these two elements affect overall system performance. Timken lubricants help bearings and related components operate effectively in demanding industrial operations. High-temperature, anti-wear and water-resistant additives offer superior protection in challenging environments.

Timken Premium All Purpose Industrial Grease

- Part # **GR217xx**
- NLGI No. 2 extreme-pressure grease
- Solid protection against rust and corrosion
- Excellent protection against wear
- Operating temperature range of -40°C to 149°C
- Applications: Ideal for industrial bearings operating at higher-than-average temperatures and/or subjected to shock loading; heavy-duty on- and off-road applications, wheel bearings, axles, ball joints, U joints, power takeoffs, king pins, bushings, trucks, buses and automobiles

Timken Ball Bearing Electric Motor Grease

- Part # **GR218xx**
- NLGI No. 2 polyurea-thickened grease
- Protects against rust and corrosion and maintains excellent oxidation stability
- Operating temperature range of -40°C to 163°C
- Applications: Ball bearings (10,000 rpm maximum), pumps, fans, electric motor bearings and idler pulleys

Timken Construction and Off-Highway Grease

- Part # **GR219xx**
- NLGI No. 2 grease
- Provides resistance to extreme pressure caused by shock loading
- Protects against rust and corrosion
- Offers excellent high-temperature properties
- Operating temperature range of -40° C to 204° C
- Applications: High-load, low-speed applications

Timken Food Safe Grease

- Part # **GR231xx**
- NLGI No. 2 aluminum-complex thickened lubricating grease
- Provides for improved low- and high-temperature performance
- Contains extra-pressure, anti-wear additives and corrosion and oxidation inhibitors
- Operating temperatures from -4° C to 149° C
- Applications: Food processing applications

Timken Ball Bearing Pillow Block Grease

- Part # **GR220xx**
- NLGI No. 2 polyurea-thickened grease
- Outstanding long life, moderately high temperature lubrication of ball bearings
- Maintains mechanical shear ability
- Provides corrosion resistance, even in the presence of salt water
- Features low-noise characteristics and excellent pumpability
- Does not contain extreme-pressure additives but is inhibited against rust and oxidation
- Operating temperatures from -40° C to 163° C
- Applications: Lightly loaded ball bearings in housed units

Timken Synthetic Industrial Grease

- Part # **GR232xx**
- NLGI No. 1,5 multi-purpose, lithium-complex lubricating grease
- Contains extreme-pressure and anti-wear additives
- Inhibits corrosion
- Operating temperatures from -46° C to 180° C
- Applications: Wide variety of applications

Timken Mill Grease (TMG)

- Part # **GR180xx**-NLGI No. 1
- Part # **GR181xx**-NLGI No. 1,5
- Part # **GR182xx**-NLGI No. 2
- Unsurpassed resistance to water washout
- Superior protection against rust and corrosion, including salt spray
- Excellent high-temperature properties
- TMG is formulated with high VI paraffinic mineral oil, resulting in better oxidation stability than Black Magic™ formulated with low VI naphthenic base oil
- Operating temperatures from -40° C to 204° C
- Applications: Metal mills, cement and power plants and marine applications

Timken Ultra-High Speed Spindle Grease

- Part # **GR233xx**
- NLGI No. 2 polyurea-thickened grease
- Inhibits rust and oxidation
- Operating temperatures from -54° C to 149° C
- Specifically designed for ball bearings
- Applications: Ball bearing applications

Timken Multi-Use Lithium Grease

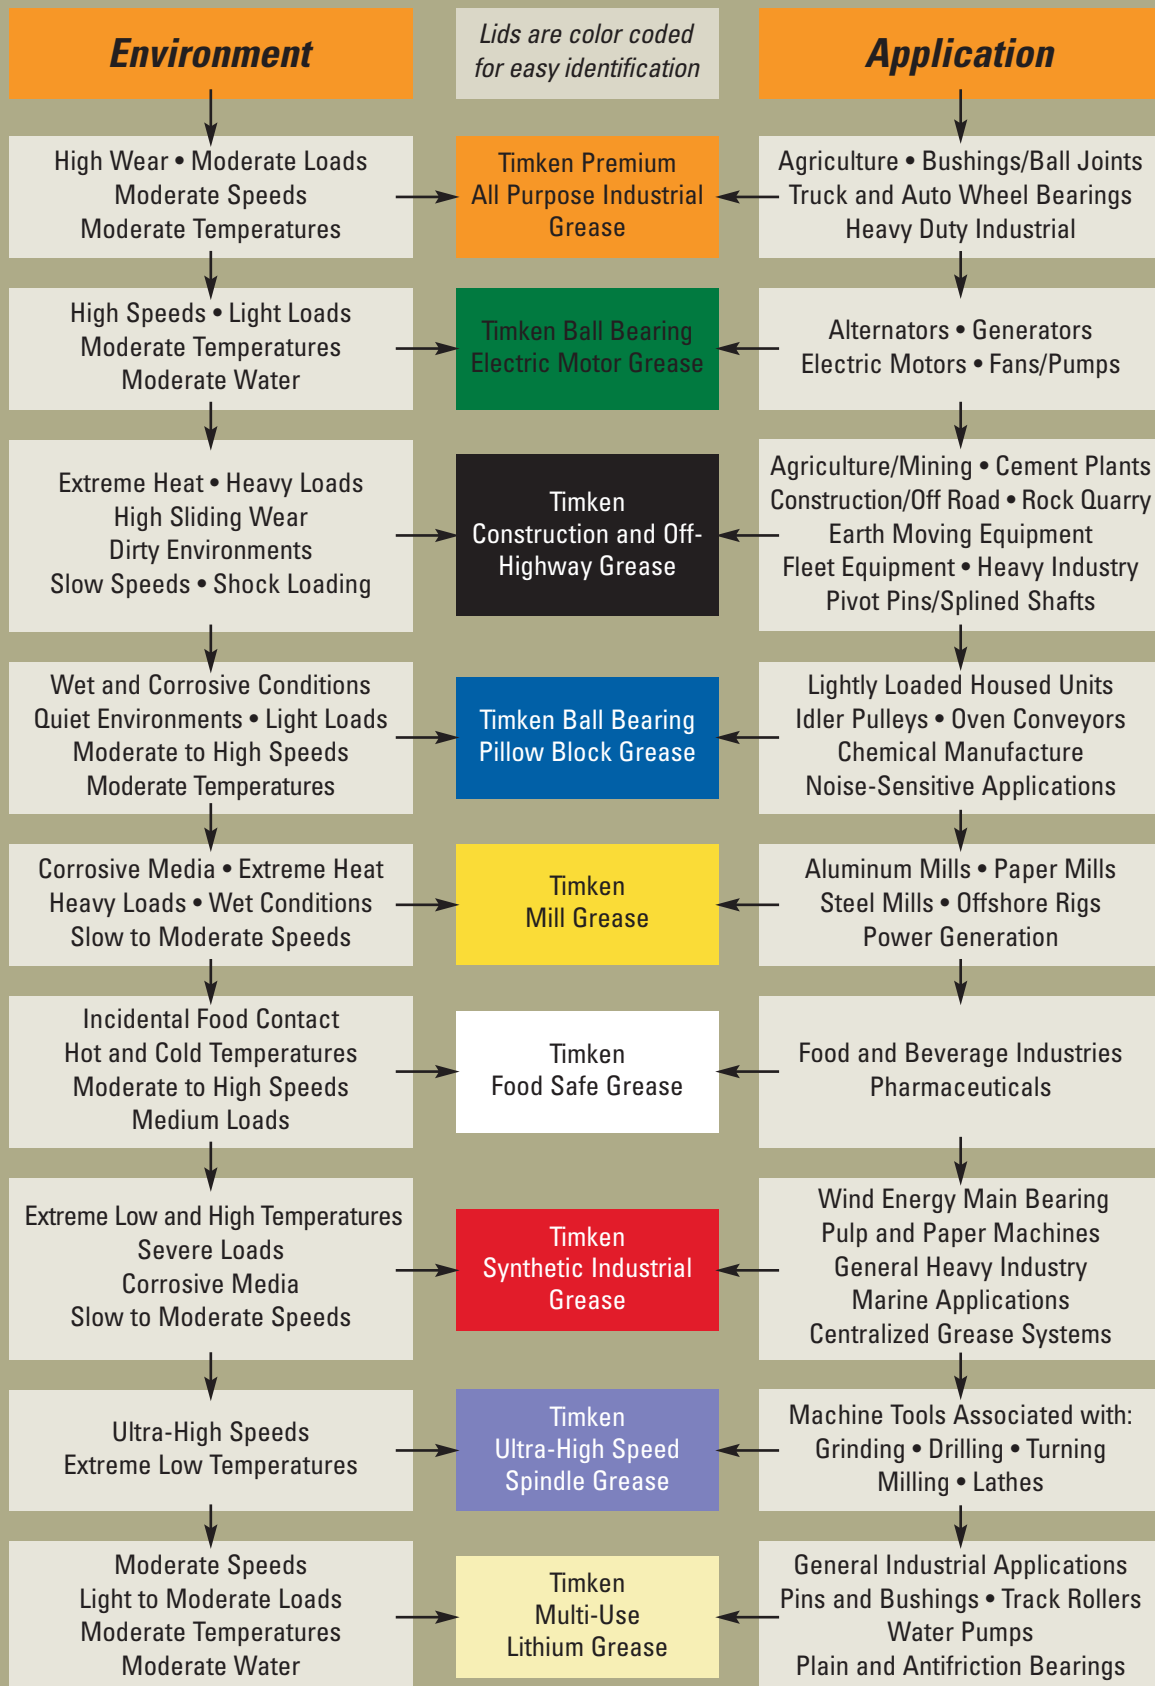

- Part # **GR236xx**-NLGI No. 1
- Part # **GR237xx**-NLGI No. 2
- Fortified with rust and oxidation inhibitors
- Applications: Used in a variety of applications where extreme pressure is not required

Suffix	Description	
GA	Squeeze tube	(0.2 kg)

L - Low M - Medium High H - High VH - Very High NA - Not applicable, grease is non-EP

Proper lubrication is critical to bearing and machine performance. In fact, poor lubrication is one of the leading causes of bearing failure. To help reduce this, Timken offers the G-Power and M-Power series of single-point lubricators. These gas and motorised units lubricate bearings, chains, guideways, and other equipment, ultimately improving productivity and reducing maintenance costs.

Features and Benefits

- The G-Power and M-Power lubricators distribute precise amounts of grease or oil into your application, simplifying maintenance activities and reducing associated costs.
- Self-operating units provide continuous lubrication over a set time period resulting in reliable performance.
- Timken offers a range of accessories to ease installation even in difficult access areas.
- A wide selection of lubricants is available to suit virtually any application.
- Timken G-Power and M-Power units operate over a broad temperature range to enhance versatility.

Lubricants available for Timken G-Power and M-Power Lubricators

Lubricant	Lub. Ref.	Application/Environment	Temp. Range	Base	Thickener	NLGI
Timken Performance Greases						
Timken Premium All Purpose Industrial Grease	217	Industrial bearings operating at high temperatures	-40° C to 149° C	Mineral	Li-Complex	2
Timken Ball Bearing Pillow Block Grease	220	Lightly loaded ball bearings in housed units	-40° C to 163° C	Mineral	Polyurea	2
Timken Mill Grease	182	Metal mills, cement and power plants, marine applications	-40° C to 204° C	Mineral	Calcium Sulfonate	1
Standard Greases						
Multipurpose Grease	601	Roller bearings, sliding bearings, guide ways	-25° C to 130° C	Mineral	Lithium	2
Extreme-Pressure Grease	602	High loads	-30° C to 120° C	Mineral	Li+MoS2	2
High-Temperature Grease 160	604	High operating temperatures	-20° C to 160° C	Mineral	PHS	0/1
Fluid Grease	606	Narrow tubes	-20° C to 130° C	Mineral	Al-Complex	0
Low-Temperature Grease 50	607	Low operating temperatures	-50° C to 150° C	Synthetic	Lithium	2
High-Performance Oil	610	Open gears and lubrication with brushes	-20° C to 250° C	Synthetic	-	-

The lubricant reference is either stamped on top of the unit (101 and 103 models), or printed on the label (102, 300 and 400 models).

Many other lubricants are also available. Please contact your Timken representative for more information.

Value-Added Maintenance Programs

With more than 100 years of experience in bearings and related technology, Timken understands the importance of the relationship between proper maintenance practices and maximizing bearing life. High-quality Timken maintenance products, such as, single-point lubricators, lubricants, induction heaters, impact fitting tools and pullers, help decrease downtime and lower operating costs.

More than 50 percent of all bearing failures caused by lubrication issues can be avoided, increasing productivity and efficiency of equipment. By using Timken single-point lubricators, production breakdowns caused by insufficient or incorrect lubrication can be easily eliminated. Timken's wide variety of reliable, precise and fully automatic lubrication solutions can be matched to the requirements of the individual lubrication points, helping to reduce maintenance costs and increase the service life of equipment.

Timken G-Power Single-Point Lubricators

Mode of operation: By screwing a color-coded activator screw into the top of the unit, a gas-generating pellet falls into a reservoir of liquid electrolyte. The resulting chemical reaction builds up pressure inside the unit, which forces a piston forward, and consequently, discharges the lubricant.

The rate of discharge is determined by the selection of the activator screw. The range of standard lubricants can be found on page 7.

All units have a G $\frac{1}{4}$ thread.

MODEL 101 • 120 cc (4.05 fl. oz.)

M-POWER

(MOTORISED LUBRICATOR)

		
Model Number	300	400
Name	Variable Drive	Controlled Drive
Description	General purpose lubricator with a plastic case and replaceable lubricant cartridge (either 120 or 250 cm ³). The battery-powered electromechanical drive is reusable.	Programmable lubricator with a plastic case and replaceable lubricant cartridge (either 120 or 250 cm ³). The electromechanical drive is connected to your machine and is reusable.

Replacement Set Part Number <small>(XXX is the lubricant reference)</small>	PM241XXX - 120 cm ³ unit PM281XXX - 250 cm ³ unit <small>(The replacement part number includes both the lubricant cartridge and the battery)</small>	PM240XXX - 120 cm ³ unit PM280XXX - 250 cm ³ unit <small>(The replacement part number is just the cartridge only)</small>
Lubrication Period	Can be set to 1, 3, 6 or 12 months	Variable according to set-up
Max. Pressure	75 psi/5 bar	75 psi/5 bar
Ambient Temperature	-10° C to +50° C	-10° C to +50° C
Approx. Weight	With 120 cm ³ unit = 498 g With 250 cm ³ unit = 652 g	With 120 cm ³ unit = 430 g With 250 cm ³ unit = 590 g
Dimensions	Height: 120 cm ³ unit = 165 mm 250 cm ³ unit = 215 mm Max diameter = 71 mm	Height: 120 cm ³ unit = 165 mm 250 cm ³ unit = 215 mm Max diameter = 71 mm

Timken M-Power Single-Point Lubricators

The M-Power consists of a drive unit (with battery for the variable drive unit) and a replaceable lubricant cartridge. The battery should be replaced whenever the lubricant cartridge is changed.

Mode of operation: The intermittent drive slowly winds the piston down a thread, which forces out the lubricant. The unit can

be turned on and off at any time. The operating mode of the unit can be seen from the LED display (the modes of operating, discharging, empty lubricant cartridge and malfunctioning are indicated).

All self-supporting units should be used with the support adapter (PA800150) which has a G $\frac{1}{4}$ thread.

G-Power Activators	Description	Part Number
	G-Power activator – 1 m, yellow + black seal	PG111000
	G-Power activator – 3 m, green + black seal	PG112000
	G-Power activator – 6 m, red + black seal	PG113000
	G-Power activator – 12 m, gray + black seal	PG114000
	G-Power clear activator – 1 m, yellow + pink seal	PG115000
	G-Power clear activator – 3 m, green + pink seal	PG116000
	G-Power clear activator – 6 m, red + pink seal	PG117000
	G-Power low temp activator – 1 m, black	PG118000

M-Power	Description	Part Number
	M-Power support adapter	PA800150
	M-Power plastic wet cap	PA800248
	M-Power control motor drive cable	PM205000
	M-Power battery pack	PM207000

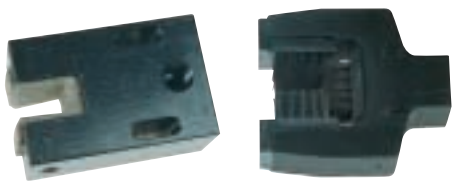

Mounting	Description	Part Number
	Mounting clip	PA800101
	Mounting bracket	PA800102
	Insert for bracket	PA800103
	Oil throttle	PA800131
	Mounting angle 50 x 50 x 70 x 2,5 mm	PA800120
	Mounting angle 50 x 70 x 70 x 2,5 mm	PA800121
	Mounting angle 50 x 100 x 70 x 2,5 mm	PA800122
	Mounting plate 110 x 70 x 2,5 mm	PA800123

Tubing and Connectors	Description	Part Number
	8 mm nylon tube (per m)	PA800107
	Tube connection to lubricator	PA800104
	Tube connector G 1/4	PA800105
	Tube connector G 1/8	PA800106

Pipe Fittings	Description	Part Number
	Angle 45° G 1/4	PA800207
	Angle 90° G 1/4	PA800237
	Extension G 1/4: 30 mm	PA800244
	Extension G 1/4: 45 mm	PA800245
	Extension G 1/4: 75 mm	PA800246
	Extension G 1/4: 115 mm	PA800247
	Hexagon nipple G 1/4	PA800147
	T-adapter	PA800222

Reducers	Description	Part Number
	Reducer G 1/8	PA800201
	Reducer G 1/2	PA800241
	Reducer G 3/4	PA800242
	Reducer M6	PA800119
	Reducer M8 x 1	PA800238
	Reducer M10	PA800240
	Reducer M10 x 1	PA800239
	Reducer M12	PA800243
	Reducer M12 x 1	PA800140
	Reducer M12 x 1,5	PA800141
	Reducer M14	PA800143
	Reducer M14 x 1,5	PA800142
	Reducer M16	PA800144
	Reducer M16 x 1,5	PA800145

Brushes	Description	Part Number
	Oil brush 20 mm round G 1/4	PA800108
	Oil brush 40 x 30 mm G 1/4	PA800109
	Oil brush 60 x 30 mm G 1/4	PA800110
	Oil brush 100 x 30 mm G 1/4	PA800111
	High temp brush (180°C) 40 x 30 mm	PA800113
	High temp brush (180°C) 60 x 30 mm	PA800114
	High temp brush (180°C) 100 x 30 mm	PA800115
	High temp brush (350°C) 40 x 30 mm	PA800116
	High temp brush (350°C) 60 x 30 mm	PA800117
	High temp brush (350°C) 100 x 30 mm	PA800118

Special Equipment	Description	Part Number
	Rail oiler + oil throttle (5 mm felt)	PA800161
	Rail oiler + oil throttle (9 mm felt)	PA800162
	Rail oiler + oil throttle (16 mm felt)	PA800163
	Rail oiler felt insert 16 mm	PA800135
	Rail oiler felt insert 5 mm	PA800133
	Rail oiler felt insert 9 mm	PA800134
	Chain lubrication box	PA800136
	Rotating brush for chain lubrication box	PA800137

Pre-Lub Cartridges	Description	Part Number
	Pre-lube cartridge 1 kg	PA801xxx
	Pre-lube cartridge 400 g	PA802xxx
	Pre-lube cartridge 1 l	PA803xxx
	Timken grease cartridge 400g	GRxxxGE
	Timken grease tub 1kg	GRxxxGF

WARNING

Proper maintenance and handling practices are critical. Failure to follow installation instructions and to maintain proper lubrication can result in equipment failure, creating a risk of serious bodily harm.
